

# Smart Medic Kit

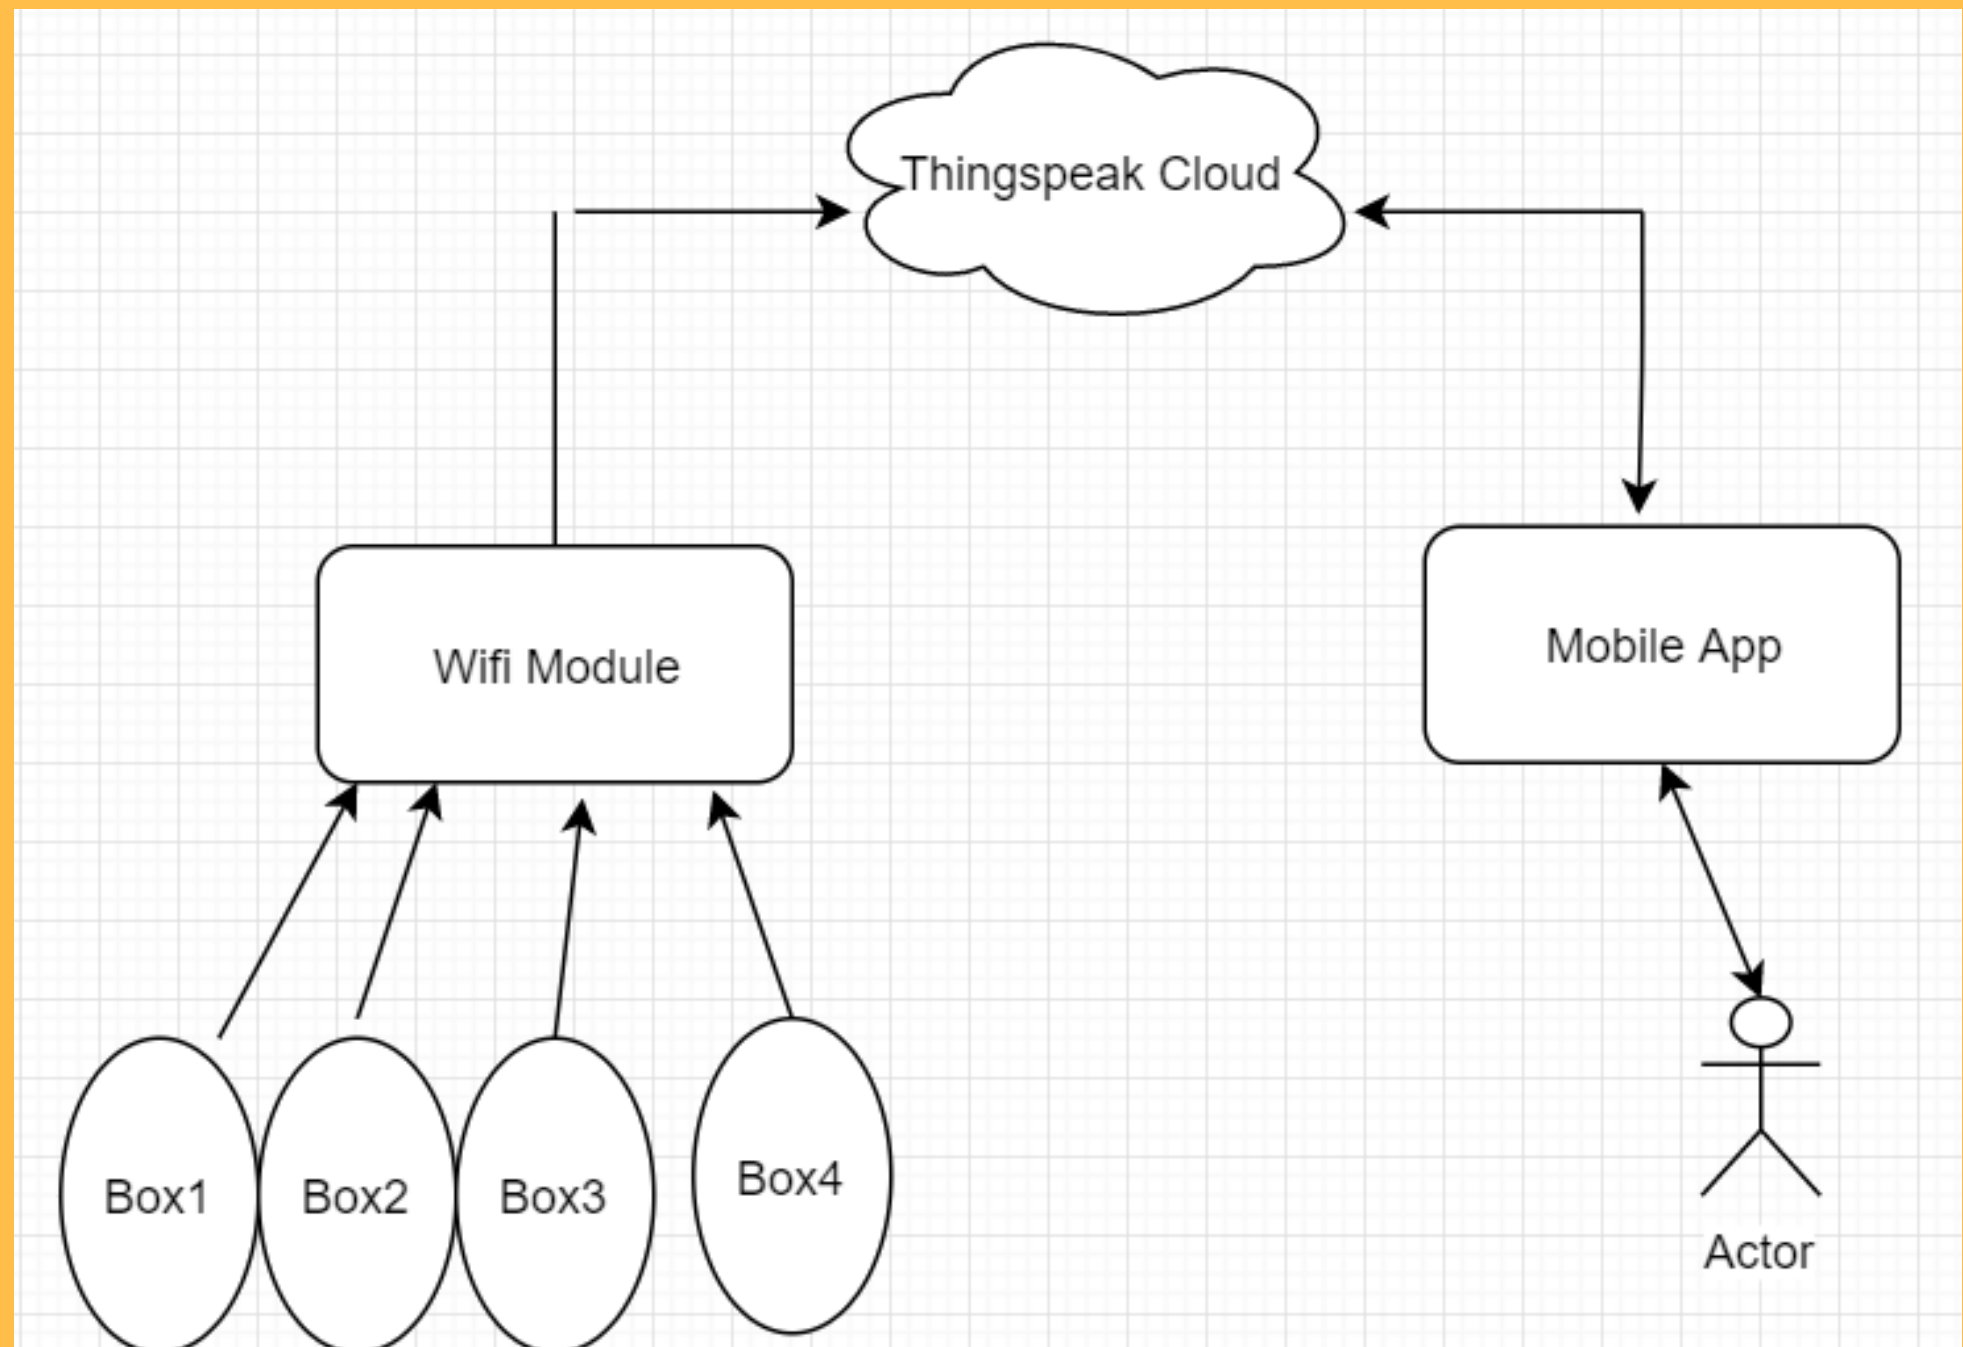

## Abstract

Getting old is often synonymous with having to take copious amounts of medicines, and remembering which pills to take when becomes a rather arduous task. The idea our team has come up with, hopes to solve this very problem. It has been perused that people who are on certain medication usually forget to take their medicines on their respective scheduled time. This seems to be a very paltry problem but actually it can be hazardous for health.

## Objective

To make the life of elderly people simple and providing them with

## Flow Diagram

## App

User can set the timer for all the four boxes, representing the time of the day ie-Morning, Afternoon, Evening and Night

The user will get speech reminder at the time of scheduled time that user has fixed.

## Application

In simple terms, the Smart Medic Kit aims to help the elderly people in taking their medicines on time, as they are quite likely to forget the same.

1. The production cost, if made commercially will come to 500 rupees or less. While we took significantly more than to do the same, the cost will be reduced when it is all done in bulk.
